

# Places to Be

## Enhancing Hybrid Work Environments

# About me

- Jordy van Veelen
  - Microsoft 365 consultant / ShareValue
  - Hardlopen, Bootcamp, koken en bakken
  - Vrijwillige Brandweer
- 
- LinkedIn  
<https://www.linkedin.com/in/jvanveelen/>

Typical  
workday traffic

- 
- Searching for a workspace or
  - Booking a meetingroom

- At the end a lot frustration
- No workspace
- All meetingsroom not available

# Hybrid Working Statistics Overview

## Employee Preferences:

- 44% of employees favor hybrid working arrangements
- 48% express a desire to be fully remote

## Employer Support:

- 51% of employers support the hybrid work model
- Only 5% mention fully remote work as a possibility

## High-Growth Companies:

- 63% of high-revenue growth companies embrace hybrid workforce models

## Worker Preferences:

- 83% of workers prefer a hybrid model
- Gen Z employees particularly value some form of onsite work

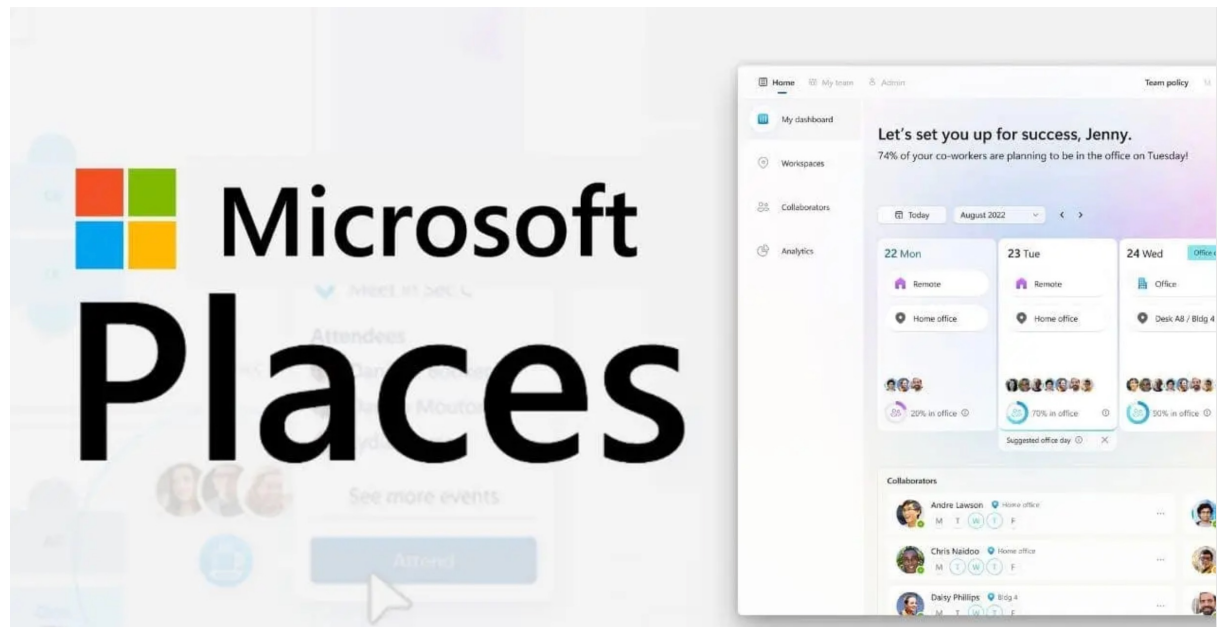

## Adoption by Leaders:

- 64% of leaders report their companies use a hybrid model

# Introduction to Microsoft Places

# Overview of Microsoft Places

## Centralized Workspace Management

- Microsoft Places acts as a centralized hub for managing both physical and virtual workspaces efficiently.

## Integration with Microsoft Apps

- It integrates seamlessly with other Microsoft applications, enhancing productivity and ease of use for teams.

## Support for Flexible Work

- Designed to support flexible work arrangements, it enhances collaboration and communication among teams.

# Key Features and Benefits

## **Coordinate**

- Work locations with your colleagues, ensuring that you're in the office at the right times and booking the necessary workspaces and meeting rooms.

## **Modernize**

- Your workplace with intelligent technology that provides insights into what's happening in your buildings and who's present.

## **Optimize**

- The workplace for changing needs, using data to adapt spaces to employees evolving work habits

# Target Audience and Use Cases

## Hybrid Work Model Adoption

- Microsoft Places is designed for organizations embracing hybrid work models, facilitating smoother transitions between remote and in-office work.

## Flexible Office Arrangements

- The platform supports flexible office arrangements, allowing organizations to optimize their workspace based on employee needs and preferences.

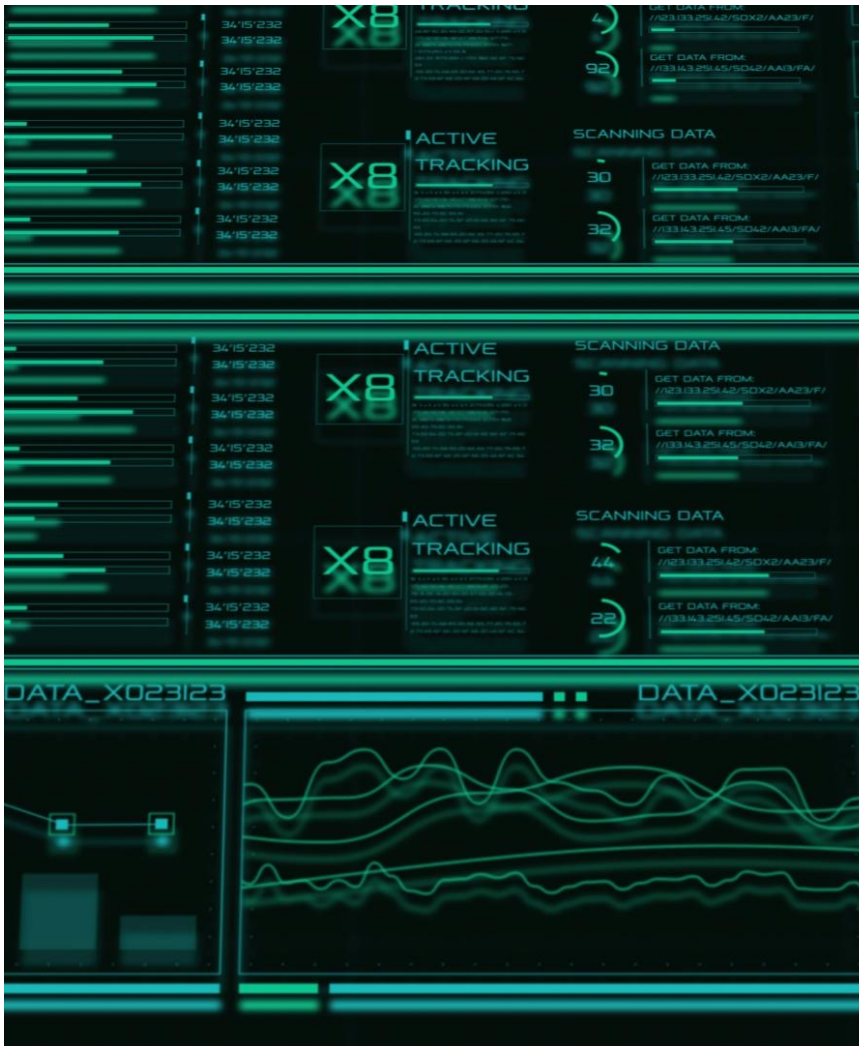

## Remote Collaboration Enhancement

- Microsoft Places enhances remote collaboration, ensuring distributed teams can effectively communicate and work together regardless of location.

## Hybrid Working for End Users

# License and App availability

## License requirements

- Microsoft 365 subscription for core features
- Teams Premium for enhanced features
- Microsoft 365 Copilot for additional features

## Places app available on

- Web
- Connected app inside Outlook
- Teams
- M365 App (desktop and mobile)

## Core features

- Work plans
- Workplaces presence
- Automatic update of work location
- In-person events
- Hybrid RSVP
- Places card

## Teams Premium features

- Places Explorer
- Places Finder
- Individual desk booking
- Room check-in and auto release
- Quick book
- Team guidance
- Intelligent suggestions
- Space analytics

# Upcoming change

## 1-4-2026

- Microsoft Places licensing will shift from user-based to space-based, making core features widely available without Teams Premium.
- Advanced features like desk reservations and analytics will require a Shared Space license.
- Teams Premium users retain current capabilities until renewal, then must switch to Shared Space licensing.
- Places Finder and the Places app will be available across most user licenses;
- **Teams Premium will no longer be required** for these capabilities.
- Licensing for Microsoft Places will **transition from a user-based model to a space-based model.**

# What will happen

---

- Advanced Places functionality will require a **Shared Space license**, including:
  - Desk reservation support
  - Auto-release policies for desks and rooms
  - Space-based analytics
- Users will be able to reserve individual desks only if those desks are covered by a Shared Space license.
- Desks that are configured as bookable but not covered by a Shared Space license will appear as unavailable to users.
- Auto-release policies for desks and rooms will be enforced only when the space is covered by a Shared Space license.
- Admins will still be able to configure auto-release policies, but these policies will not take effect unless the related spaces are licensed with a Shared Space license.

## Microsoft 365 Copilot for additional features

- Managed room booking

### **Coming soon:**

- New map-based room booking experience in Places finder
- New profile cards for buildings, room and desks

# Workplace presence

---

The screenshot displays the Microsoft Workplace Presence interface. At the top, there's a navigation bar with a calendar icon, the text "Vandaag" (Today), navigation arrows, the date "9-13 Maart, 2026", and a "Werkweek" (Workweek) view selector. The main area shows a calendar for Monday, March 9, with a blue dot indicating presence at 9:00. A sidebar on the right provides details for "Contoso HQ 1". It shows a status "Gepland in Contoso HQ 1 vandaag" (Planned in Contoso HQ 1 today) with a green checkmark and a settings gear. Below this, it lists the location "Contoso HQ 1" with a dropdown arrow, the time "8:00 - 17:00", and a link "Bureau reserveren Marketing HQ1/1 ...". A blue button labeled "Inchecken" (Check in) is present. Further down, it states "Geen collega's in Contoso HQ 1" (No colleagues in Contoso HQ 1). A section titled "Vergaderruimten reserveren voor deze vergaderingen" (Reserve meeting rooms for these meetings) lists a meeting: "Sales Team Meeting" by Megan Bowen, scheduled for 17:00 for 1 hour. It also indicates "+1 vergadering" (1 more meeting) and a link "Ruimten reserveren" (Reserve rooms). At the bottom of the sidebar is a link "Meer in Places" (More in Places) with a location pin icon.

# Places management

# Floors / rooms

The screenshot displays the Microsoft Places 'Ruimtebeheer' (Space Management) interface. At the top, there's a navigation bar with 'Places', 'Ruimtebeheer' (active), and 'Ruimteanalyse'. A user profile 'Jordy van Veelen' is shown with the subtitle 'Beheer de gebouwen, ruimtes en middelen van je organisatie.' Below this, there are three filter dropdowns: 'Land of regio' (Alle landen), 'Staat of provincie' (Alle statussen), and 'Plaats' (Alle steden). A '+ Nieuwe maken' button is on the right. The main content area is divided into two sections. On the left, under 'Niet-toegewezen ruimte', there's a 'Gebouwen' sidebar with a search icon and a list of buildings: 'Contoso Chicago', 'Contoso HQ 1' (selected), 'Contoso HQ 2', and 'Contoso Paris'. The main area on the right shows a search bar 'Zoeken op naam' and a table of building details. The table has columns for building name, location, and room count. The data is as follows:

| Building       | Location     | Room Count |
|----------------|--------------|------------|
| Aspen HQ1/1    | Contoso HQ 1 | 8          |
| Bodie HQ1/1    | Contoso HQ 1 | 6          |
| Denali HQ1/1   | Contoso HQ 1 | 8          |
